

Listing of the Claims:

1-29. (Cancelled)

30. (Currently Amended) A wiper as defined in claim [[27]] 35, wherein said one or more nonionic surfactants are present in an amount between about 0.01% to about 1% by weight of said sanitizing formulation.

31-34. (Cancelled)

35. (Currently Amended) A wiper comprising a nonwoven fabric and a sanitizing formulation applied to said nonwoven fabric in an amount from about 150% to about 600% of the dry weight of the wiper, said sanitizing formulation consisting essentially of comprising a surfactant component that consists essentially of one or more nonionic surfactants, and said sanitizing formulation further comprising between about 0.01% by weight to about 0.4% by weight of at least one benzalkonium halide, between about 0.01% to about 0.5 % by weight of ethylenediaminetetraacetic acid and/or salts thereof, and a solvent;

wherein said sanitizing formulation has a pH of greater than about 8 and is configured so that said formulation is released from said nonwoven fabric as a solution during use of the wiper in food service applications, said benzalkonium halide being present within said released solution in an amount less than about 2000 parts per million of said released solution, and wherein the wiper exhibits a Kill Efficiency Ratio for *E. Coli*, *S. Aureus*, or both of at least about 100.

36. (Canceled)

37. (Previously Presented) A wiper as defined in claim 35, wherein the wiper exhibits a Kill Efficiency Ratio for *E. Coli*, *S. Aureus*, or both of at least about 200.

38. (Previously Presented) A wiper as defined in claim 35, wherein said benzalkonium halide is present in an amount of between about 150 to about 400 parts per million of said released solution.

39-50. (Cancelled)

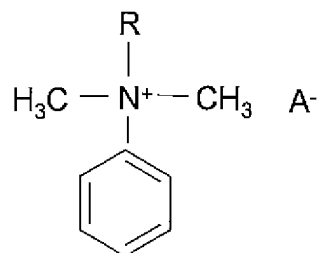

51. (Previously Presented) A wiper as defined in claim 35, wherein said benzalkonium halide is present in an amount of less than about 400 parts per million of said released solution.

52-53. (Cancelled)

54. (Previously Presented) A wiper as defined in claim 35, wherein said nonwoven fabric contains cellulosic fibers.

55-68. (Cancelled)

69. (Previously Presented) A wiper as defined in claim 35, wherein said benzalkonium halide has the following formula:

wherein,

R is a C₈-C₁₈ alkyl group; and

A is a halogen atom.

70. (Previously Presented) A wiper as defined in claim 35, wherein said solvent sanitizing formulation further comprises includes between about 0.001% to about 30% by weight of non-aqueous solvent.

71-72. (Canceled)

73. (Previously Presented) A wiper as defined in claim 35, wherein the pH of said sanitizing formulation is between about 9 to about 12.

74. (Previously Presented) A wiper as defined in claim 35, wherein the wiper exhibits a log reduction for *E. Coli* of at least about 3.

75. (Previously Presented) A wiper as defined in claim 35, wherein the wiper exhibits a log reduction for *E. Coli* of at least about 4.

76. (Previously Presented) A wiper as defined in claim 35, wherein the wiper exhibits a log reduction for *E. Coli* of at least about 5.

77. (Previously Presented) A wiper as defined in claim 35, wherein the wiper exhibits a log reduction for *S. Aureus* of at least about 3.

78. (Previously Presented) A wiper as defined in claim 35, wherein the wiper exhibits a log reduction for *S. Aureus* of at least about 4.

79. (Previously Presented) A wiper as defined in claim 35, wherein the wiper exhibits a log reduction for *S. Aureus* of at least about 5.

80. (Previously Presented) A wiper as defined in claim 35, wherein the wiper exhibits a Kill Efficiency Ratio for *E. Coli*, *S. Aureus*, or both of at least about 100.

81. (Previously Presented) A wiper as defined in claim 35, wherein the wiper exhibits a Kill Efficiency Ratio for *E. Coli*, *S. Aureus*, or both of at least about 400.

82. (New) A wiper as defined in claim 35, wherein said solvent consists of water.
